Dimitar Yanev

JavaScript Developer

A driven and eager JavaScript enthusiast with a thirst for knowledge and a genuine passion for coding. Despite being at the early stages of my journey, I approach challenges with tenacity and a strong will to learn.

PERSONAL PROJECTS

BlackJack Game ↗

- *In this project, I designed and developed an engaging web-based Blackjack game using JavaScript, CSS, and HTML. Through this endeavor, I honed my programming skills and gained a deep understanding of game mechanics and logic.*

Personal Portfolio Site ↗

- *Building my own personal portfolio site was an incredible learning experience. Using JavaScript, HTML, CSS, I designed a visually appealing and responsive site that showcases my projects and skills.*
- Deployed at: https://portfolio-v2-delta-six.vercel.app/

Products Listing Page ↗

- *In this project, I successfully developed a responsive and user-friendly product listing page using JS, CSS, HTML and Vite. The page dynamically rendered product data from a JSON file, allowing users to explore various products with sorting and filtering options for easy organization.*
- Deployed at: https://product-listing-page-nine.vercel.app/
